Supplementary Fig. 1. $^{[18]}$F-THK5351 PET and magnetic resonance images of PPA patients. Representative slices in the horizontal directions of $^{[18]}$F-THK5351 PET and 3 dimensional T1-weighted MPRAGE scans taken from 13 patients diagnosed with PPA. A: nfvPPA. B: svPPA. C: lvPPA. lv: logopenic variant, MPRAGE: magnetization-prepared rapid gradient-echo, nfv: nonfluent variant, PPA: primary progressive aphasia, SUV: standardized uptake-value, sv: semantic variant.
